

RUST CLEANER

Granite Oxides Dissolver

Revision 01/2008

DESCRIPTION

RUST CLEANER is a dissolving liquid for oxides crystals of the mineral frame. RUST CLEANER is a concentrated liquid containing orthophosphoric acid.

APPLICATION SECTORS

RUST CLEANER eliminates spots or oxides stratum from granites and from not-bright stone materials. It is a professional product. Chemio Tecnica suggests to do a test in little part before the whole cleaning.

CHARACTERISTICS

Aspect	Liquid	Ph	1,3 +/- 0,2
Colour	No colour	Specific Weight	1,2 +/- 0,1 g/ml at 20°C
Fragrance	Distinctive	Inflammability	Not Inflammable

USE

Apply PURE or diluted with water.

APPLICATION

Apply using a brush only on the part concerned. Rinse with water. At the end, Chemio Tecnica suggests to use our products FLOOD and GS10 to passivate the surface. Do not use RUST CLEANER on bright and soft materials.

OUTPUT from 5 to 40 mq/litre

WARNINGS

RUST CLEANER is corrosive for the presence of phosphoric acid. Avoid the contact with skin and eyes. Use rubber, PVC, Neoprene gloves and security glasses. Before using the product, read the safety schedule.

SPREADING

In case of spreading, absorb using no combustible inerts. Neutralize with sodium carbonate or with our POLICLEANER to stop acid action. Pick up in draining containers. Wash the concerned area.

STORAGE Keep in fresh and windy places.

PACKING

1 litre bottle	12 x 1 litre	Cardboard
5 litres can	6 x 5 litres	Cardboard
25 litres can	1 x 25 litres	Can

SAFETY INSTRUCTIONS

R 34 – It causes scalds

S 2 - Keep away from children
