

# GLASSJ

## Paste Wax

Revision 02/2008

### DESCRIPTION

**GLASSJ** is a paste solutrope composed by hard natural solvent waxes. **GLASSJ** protects, masks light defects and it revives and intensifies the brightness of the treated surfaces. The protective film reduces the formation of the dirt and makes easy the next cleaning.

### APPLICATION SECTORS

**GLASSJ** is a wax indicated for all internal porous surfaces for the finishing of marbles, granites, natural stones, terracotta etc.

### CHARACTERISTICS

Aspect Fragrance	<b>Homogeneous paste Distinctive</b>	Colour Point of Inflammability	<b>White &gt; 25°C</b>
---------------------	------------------------------------------	-----------------------------------	----------------------------

**USE** Apply PURE

### APPLICATION

Apply uniformly using a cloth on dry and clean surfaces: warm the surface before the application to increase absorption. After two-three minutes from the application, polish the surface by a monobrush with a soft felt or steel wool to obtain the desired brightness. For a complete protection and to increase the absorption uniformity, before the application of **GLASSJ**, spread one of our oil and water repellent.

Avoid the application of wax in places with high dampness because there could be detachments and white marks.

**OUTPUT:** from 8 to 15 mq/litre

### WARNINGS

Easily inflammable. Irritating for skin.

**SPREADING** In case of spreading, absorb using inerts.

**STORAGE** 12 months at the advised temperature of 15-20°C in a windy and fresh place. Avoid exposure to the sun.

### PACKING

1 litre tin	12 x 1 litre	Cardboard
-------------	--------------	-----------

### SAFETY INSTRUCTIONS

**Classification and labelling: Xn-Injurious F-Easily Inflammable**

R 11 – Easily inflammable

R 38 – Irritating for skin

R 65 – Injurious: it can cause pulmonary damages if ingested

R 67 – The inhalation of vapours can cause drowsiness and dizziness

S 2 - Keep away from children

S 16 – Keep away from flames and sparks

S 24 – Avoid contact with skin

S 29 – Do not throw scraps in the sewerage system

S 33 – Avoid the store of electrostatics charges

S 37 – Use suitable gloves

S 43 – In case of fire, use chemical foam

S 46 – In case of ingestion, call the doctor and show the case or the label of the product

S 60 – This product and the container must be dispose as dangerous refusals

S 62 – In case of ingestion, do not cause vomit. Call immediately a doctor and show the container and the label.
