

NASS

Tonalizzante Oil and Water Repellent

Revision 02/2008

DESCRIPTION

NASS is a product that improves the tone of the surface with a light oil and water repellent effect.

Characteristics: water steam permeability of treated surfaces – no filming on the surfaces – U.V. stability – little alkaline solutions stability – fast polymerization – fast drying up – easy to apply

Certified Transpirable Product: nr.report test 3816 of 26/05/2008 (Laboratory Contento Trade srl-UD)

APPLICATION SECTORS **NASS** is used for the protection of internal and external building materials. **NASS** improves the tone of the stone and it increases the contrast of the natural veins.

CHARACTERISTICS

Aspect	Liquid	U.V. Ray	Excellent Endurance
Colour	No colour	Film	NO
Fragrance	Distinctive	Polymerization	5-8 minutes
Inflammability	Inflammable	Active Principles	Fluorinated

USE Apply PURE.

APPLICATION Apply a coat of product on clean and dry surfaces by using low pressure sprayer, soak or brush. After 5-10 minutes, remove possible excesses using a clean cloth felt or a felt disk. Apply a second coat of product if you want to increase more the tone given. Apply a coat of YPOX as finishing to improve oil and water repellent protection. The maximum protective effect is obtained after 3 hours from the application. Verify the effect on a little part of the surface. The advised temperature for the application is 15-20°C. The product doesn't protect from acids. Treat again every 3-5 years.

ATTENTION: don't use soft plastic containers (only hard plastic). Sprayers and airless guns packings must be suitable for solvents.

OUTPUT from 5 to 20 mq/litre The following minerals are a selection of surfaces where **NASS** has been tested. Outputs depend on the mineral finishing and on the type of the application and so the following data are for guidance:

- Serena Stone	from 5 to 10 mq/litre
- Tuscan terracotta	from 8 to 14 mq/litre
- National Travertines, Rosso Verona, Venetian terrace, Giallo Atlantide	
- Juparana Colombo, Indian Juparana	from 10 to 16 mq/litre
- Piasentina Stone, Trani, Botticino, National Granites, Biancone, Indian absolute Black	from 12 to 20 mq/litre

WARNINGS Easily inflammable. Irritating for eyes. Do not inhale vapours. Avoid contact with eyes and skin. Use protective clothes and gloves and protect eyes and face. Before using the product, read the safety schedule.

SPREADING In case of spreading, absorb using inerts, sand or earth.

STORAGE Keep in fresh and windy places. Keep away from flame and sparkles.

PACKING

1 litre bottle	12 x 1 litre	Cardboard
5 litres can	6 x 5 litres	Cardboard
25 litres can	1 x 25 litres	Can

SAFETY INSTRUCTIONS

Symbols for the labelling: Xi - Irritating F – Easily inflammable

R 11 – Easily Inflammable

R 36 – Irritating for eyes

R 66 – The continuous exposure can cause dryness and chaps on the skin

R 67 – The inhaling of the vapours can cause drowsiness and dizziness

S 2 - Keep away from children

S 7 – Keep the container closed

S 9 – Keep the container in a windy place

S 16 – Keep away from flame and sparkles

S 24/25 – Avoid contact with eyes and skin

S 26 – In case of contact with eyes, clean immediately with water and call the doctor

S 43 – In case of blaze, use sand, dry-stone chemical or frothy agent

S 46 In case of ingestion, call the doctor and show the case or the label of the product
